Supplementary Information File

A. Questionnaire about Privacy Attitudes

Table 1. Research constructs and items.

Constructs	Items
Application installation privacy practices (5-point Likert scale)	AIP1. How often do you read the privacy policy, terms and other important information found in an app's description on the App Store before installing it?
	AIP2. How often do you read about the permissions required for an app before installing it, and the types of user data it can collect (e.g. permission to access the camera)?
	AIP3. Have you ever chosen not to install an app on your smartphone due to the permissions it requested?
	AIP4. Before granting any permission to an app, I think carefully about installing it on my smartphone.
	AIP5. Some applications ask you to create a user account and fill in personal information upon installation. In what percentage of the cases do you intentionally provide false information?
Privacy practices for managing permissions and privacy settings (5-point Likert scale)	PMP1. Have you ever checked the permissions of the various applications installed on your smartphone in the Settings menu?
	PMP2. How often do you adjust the app permission settings on your mobile phone? For example, to remove a granted permission or grant a denied permission.
	PMP3. Have you ever refused to grant an app permission on your mobile device because you thought it would collect your sensitive information?
	PMP4. How often do you change the default privacy settings on any of your apps?
	PMP5. Have you ever used account settings to limit the data that could be collected or used?
Technical knowledge and skills (5-point Likert scale)	TKS1. I know how to grant or deny an application's access permission, e.g. to my photos or location, through my mobile phone's Settings.
	TKS2. I know how to change the privacy settings on an account, e.g. a social networking account, that I manage on my smartphone.
	TKS3. I am aware of the permissions used in the smartphone apps that I frequently use.
	TKS4. If an app on my mobile phone uses permissions, then it can access certain resources on my device, e.g. photos, my location, etc.
	TKS5. Granting permissions to an app can give it access to my personal information even when I'm not using it.
	TKS6. Accepting permissions may allow apps to read, modify or delete my data on my device at any time without notifying me.
Understanding of app permissions (5-point Likert scale)	UAP1. I find privacy and permissions settings easy to understand.
	UAP2. I understand the privacy policies of apps before giving permission to use my data.
	UAP3. I usually understand what information app permissions are seeking to access before giving my consent.
	UAP4. I understand why certain permissions are requested by smartphone apps that I frequently use.
Levels of comfort regarding data sharing (5-point Likert scale)	LC1. I am comfortable providing sensitive information to apps.
	LC2. I am comfortable with apps accessing data that I have created (e.g., pictures I have taken with my camera).
	LC3. I am comfortable with apps collecting information about me.
	LC4. I am comfortable with my device camera and/or microphone to record me.
Privacy concerns (PC) (5-point Likert	PC1. How concerned are you, in general, about your privacy when using your smartphone?
	PC2. I am concerned that mobile apps are collecting too much information about me.
	PC3. I am concerned that mobile apps may monitor my activities or my location on my mobile device.
	PC4. I believe that as a result of using mobile apps, others know more about me than I am comfortable

scale)	with or would like.
	PC5. I feel that, as a result of my use of mobile apps, information about me is out there that, if used, will invade my privacy.
	PC6. I am concerned that mobile apps may use my personal information for other purposes or share it with other entities without notifying me or getting my authorization.
